### On a lighter note.

TheBosch 1st Team Captain counted the Opposition Team Squad warming up in their fancy Warm Up Kit before the recent Cricket match .

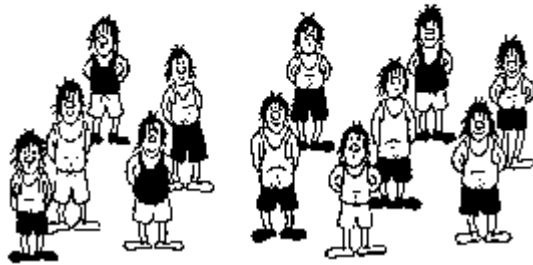

He counted 12 players.

Suddenly they changed positions in the outfield and when he counted again, he counted 13 players.

This went on and on and try as he may, he could NOT settle on whether it was 12 or 13.

Can you do better - count the players, wait until they move and then count them again.

How many players are there warming up in the opposition squad?

*Mmmmmm!*
